

BK Special Lecture Series in Geometry

FACTORIAL 3 FOLDS

박지훈(POSTECH/IBS-CGP)

2022년 2월 14-18일 매일
2:00-3:30 (대면&비대면 동시진행)

In this series of lectures, I explain how to determine whether a given 3-fold with mild singularities is factorial or not. Hypersurfaces in P^4 and double covers of P^3 with compound du Val singularities are the main objects to consider. The lectures start from scratch. The audience are assumed to have very basic knowledge of algebraic geometry.
